2.	SHEEBA S	2303811710422145
3.	SINDHUJA S	2303811710422150
4.	SRINITHI D	2303811710422156

ABSTRACT

E-Commerce Admin Login with Decoy Protection is designed to enhance security by preventing unauthorized access and cyber attacks. It provides a secure authentication mechanism using OTP verification along with honeywords and honeypot techniques. Admins can log in safely, while attackers are redirected to a decoy dashboard that tracks their activities. The system includes features like login portal, password recovery, real and decoy dashboards, and alert notifications. It ensures secure data handling, intrusion detection, and reliable protection for modern e-commerce platforms. Developed using HTML, CSS, JavaScript, and EmailJS, it ensures secure authentication, intrusion detection, and data protection.

Keywords: E-Commerce Security, Admin Login Protection, Honeywords and Honeypot
OTP Authentication, Decoy Dashboard, Cybersecurity Intrusion Detection, Secure
Authentication, Web Security
